re: NYC DPR Contract #M-54-186. The Reconstruction of Mitchel Square. Submission for City Agency Approval.

transmitted:

As requested, we have removed four trees from the sidewalk along St. Nicholas Avenue, so as not to interfere with sub-surface utilities.

Enclosed you will find one print each of the survey, and the revised removal, and utilities and grading plans. Please review these plans, and do not hesitate to call us if you require any additional information.

Thank you for your patience.

Re: NYC-DPR Contract No. M-54-186
The Reconstruction of Mitchel Square
Submission for City Agency Approval

Dear Mr. Sirico:

I am writing in regards to a NYC Department of Parks and Recreation project that falls within your jurisdiction. The Reconstruction of Mitchel Square, between Broadway and Saint Nicholas Avenue from West 166th Street to West 168th Street, will involve the removal and abandonment of existing catch basins and drainage lines; and the installation of a new drinking fountain with accompanying water line, drain line, valves and water tap. As project architect working with the NYC-DPR Job Captain, Nancy Prince, I am submitting these plans for your departments's review and approval.

Enclosed for your review are 1 print each of the revised survey (9-6-88), removal plan, and utilities and grading plan. From conversations with you approximately one and a half months ago, I understand that our plans will be reviewed and approved, or returned for revisions.

If you require additional information, please call so that we can expedite the review process.

Thank you for your cooperation.

Sincerely,

Marianne Burns

Re: The Reconstruction of Mitchel Square,
Borough of Manhattan, Contract # M-54-186.

Dear Mr. Sirico:

Enclosed for your review are revised survey, layout plan and the utilities and grading plan for the above referenced project. Throughout October we discussed the changes that were required for our plans to obtain approval from your department. This information is listed below.

1. Trees within 15'-0" of sewer line--These trees have been removed.

2. Limit of Construction--Due to the planned rehabilitation of the existing curb, the contract limit line now extends 2'-0" into the street. We realize that this will need to be approved, and will provide any additional information you require to expedite the process.

We would appreciate if you would respond to our drawings by either returning mailed prints or calling us directly with your comments. If our drawings fulfill your requirements in their current state, we will require formal notification of the approval at your earliest convenience.

Sincerely,

Marianne Burns.
