Re: Intrepid Museum -  
Combined Sewer Inspection

Dear Mr. DiMartino:

Following upon our meeting, Friday, March 12th, we respectfully request an inspection by your personnel, of the double barrel concrete sewer (exterior and interior), located at Pier 86 (46th Street) North River, site of the projected Intrepid Museum.

The exterior upper portion of the sewer structure will be exposed no later than Monday morning, March 15, 1982.

As you know, we have a short deadline for the work and we will greatly appreciate an early review and opinion concerning the installation.

Thank you.

Very truly yours,

*Robert R. Bisaccia*

INTER-DEPARTMENT  
MEMORANDUM

DATE: March 9, 1982

TO: MAGDI FARAG, P.E., CHIEF, ENGINEERING REVIEW SECTION  
FROM: NOLAN J. LAU, P.E., CHIEF, PRIVATE DRAINAGE REVIEW SECTION  
SUBJECT: INTREPID MUSEUM PROJECT - PIER 86 AT WEST 46TH STREET

BOROUGH OF MANHATTAN

This office is presently reviewing an SD 1&2 application for the subject project.

Our examination of the attendant plans indicates that a building is to be erected within the filled in portion of Pier 86 directly over an existing double barrel 6'-6" x 8'-6" sewer outfall.

Attached, please find a set of plans for the construction of said building. Kindly review the plans and advise us of any adverse structural effects the proposed building will have on the aforementioned existing sewer.
