RE: WTC-776
Dey Street Escalator-
Associated Sewer Work,
Borough of Manhattan

Dear Mr. Carlock:

We recently received a proposal from Eli Attia, Architects, which calls for sewer modification work in the vicinity of the Dey Street project. It seems that a portion of their proposal may affect the sewer work which you are presently incorporating, in the above captioned project.

I Have asked Mr. Michael Zenreich, R.A., project coordinator for Eli Attia, to contact you regarding coordination of designs. His telephone number is 867-3220.

It is my understanding that WTC-776 is still active. Kindly advise us of any change in its status.

If you have any questions please contact Mr. Douglas Smith, P.E., Acting Chief, Engineering Review Section, at 566-5616.

Very truly yours,

FREDERICK NOVOTNY, P.E., CHIEF
Div. of Sewer Regulation &
Control, Bureau of Sewers
