TELEPHONE CONVERSATION MEMORANDUM

Project AMTRAK Job No. 2162A201 Date 8/6/86
(Use Complete Number)

From G. Wall Talked to Morton Swedlow - BOS

Indicate Department, Field Office, etc. for "In House" calls.
Indicate agency or firm for other than "In House" calls.

Item Discussed Meeting to Present Concepts for Sewer Relocation/Rerouting

Information Obtained

1. Morton Swedlow was unaware of the project so I gave him a brief description, naming the impacts on the 33rd and 34th Street Sewers. I also reviewed the history to date including our July 9 submission to BOS, July 18 meeting with Mr. Farag, and my 8/6 conversation with Mr. Aggarwal.

2. I requested a meeting date of August 22, at which we would present our work on alternatives and costs. I again stated AMTRAK representatives would be in attendance, and that it may be appropriate if Mr. Farag was in attendance. He said he would check Mr. Farag's calendar and get back to me concerning the August 22 meeting date.

 Indicate agency or firm for other than "In House" calls.

Item Discussed SEE BELOW

Information Obtained SEE BELOW

- 1.) P.D. Format: I informed R.A. that in our July 18 meeting, Mr. Farag had agreed we would first submit a concept submission containing alternatives, with sufficient hydraulic data to allow selection of an alternative. After selection of an alternative, we would ultimately follow the P.D. format in our final submission. I also noted this was a project for a national railroad agency, that no additional flows were being generated as a result of the project, and therefore, that certain components of the PD format would not be applicable. In particular, I referenced Appendices after "A". I suggested we could discuss applicability of the standard PD requirements after an alternative was selected. He agreed.
- 2.) Alternatives to be Examined: I informed R.A. that we were examining 2 rerouting alternatives -- the only 2 we could identify which would not require pumping or syphons. I also noted that Amtrak had requested that we look at syphons.
- 3.) Original July 9 Submission: I informed R.A. that our submission had been based on Preliminary Engineering work done by SSVK, which showed syphons at 33rd and 34th Streets. We had made the assumption that SSVK would have checked the concept through with BOS, which they apparently did not do.

From G. Wall Talked to Raj. Aggarwal -- cont'd.

Indicate Department, Field Office, etc. for "In House" calls.
Indicate agency or firm for other than "In House" calls.

Item Discussed see below

Information Obtained see below

4.) Schedule: I informed R.A. that our conceptual work would be at a sufficient level for review by 8/22/86, and that we would like to schedule a meeting to present the results of the work on that date. I told him that our client, AMTRAK, viewed this portion of the work most seriously, and that they would be in attendance at that meeting. I suggested that, given AMTRAK's intention to attend the meeting, it may be appropriate if Mr. Farag was in attendance. He stated I should contact Morton Swedlow (566-3515) to arrange the meeting, and pass on the information that AMTRAK would attend. I said I would do so.
