There is no landlord contribution and all the money is for the City share of the construction. City's share of F&E to be in a future request

There is currently \$12,619,128 available for the OEM job at 7 WTC. In order to spend this \$\$\$, I need to write up several budget mods first. Could you please e-mail me the cost breakdown for the following:

1. design (if any)
2. landlord's share of construction
3. landlord's share of F&E (if any)
4. city share of construction
5. city share of F&E
