Executive Conference Room with integrated Video
Conferencing
- ◆ **Warner-Lambert** - Morris Plains, New Jersey
Executive Conference Rooms

Client List

LARGESCALE MULTIMEDIA AND NEW TECHNOLOGY

KBI has been at the forefront of Interactive Multimedia Technology since the early 1980's. While functioning primarily as a systems integrator, KBI has also formed strong alliances with several courseware developers, which allow us to provide total system solutions. Additionally, KBI staff develops and produces custom hardware and software that creates solutions not available from "off the shelf" products. As technology advances, KBI will continue to integrate those advances into the solutions you require.

- ◆ **AT&T** - U.S. Phone Centers - National
410 Laserdisc-based, Interactive Training Kiosks
- ◆ **AT&T** - New York City
Infoquest Public Exhibit
- ◆ **Burlington College** - Burlington, New Jersey
Multimedia Learning Center

THE OMNI

SERIES 3200

The "Omni" is all that its name implies and then some. By virtue of VanSan's exclusive "Lectrajust" height control, this lectern moves quietly and smoothly from wheelchair to full standing use. Features recessed casters for ready mobility. Work light and timer/clock are available as options. VanSan takes pride in going that extra step beyond any regulation or "touch of craftsmanship". The Omni re-enforces that dedication.

THE CUSTOMS NOM

*Custom is
the byword at
VanSan...
“what you envision
for your specific
environment”
is what you get!*

A traditional concept in dark mahogany
using mitered joinery, molded panels
and a stepped base.

1

Have it your way

...is the very essence of VanSan's customs. Whatever the wood, the finish, or the design, VanSan will be happy to work with you to create just the right custom. Custom customs, as well as other custom furnishings (tables, cabinets, etc.) of the corporate environment, have been the building blocks of VanSan's reputation for over 30 years.

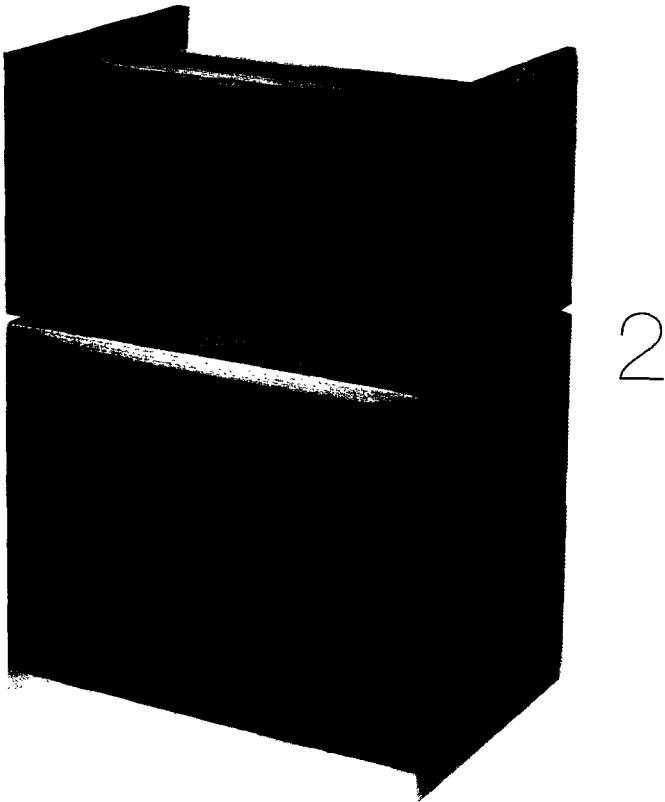

Individual statements

The following 5 pages "speak for themselves." Client concepts and designs in concert with VanSan's dedication to craftsmanship.

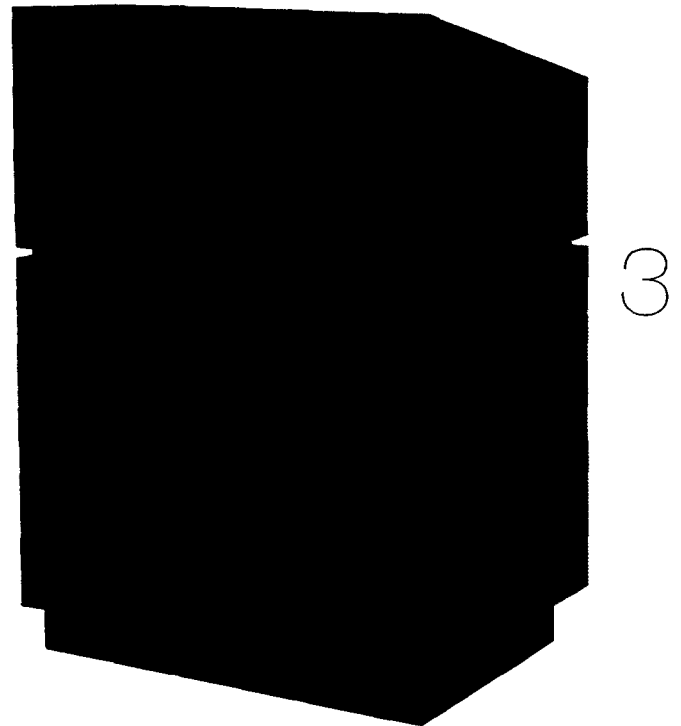

Because each one is unique, we identify them here with a simple number and their basic finish or design concept... to show the many variations that imagination can achieve.

Note: Veneers and surface materials described here were requested (as options) by the client/purchaser of that particular unit. The combinations are endless.

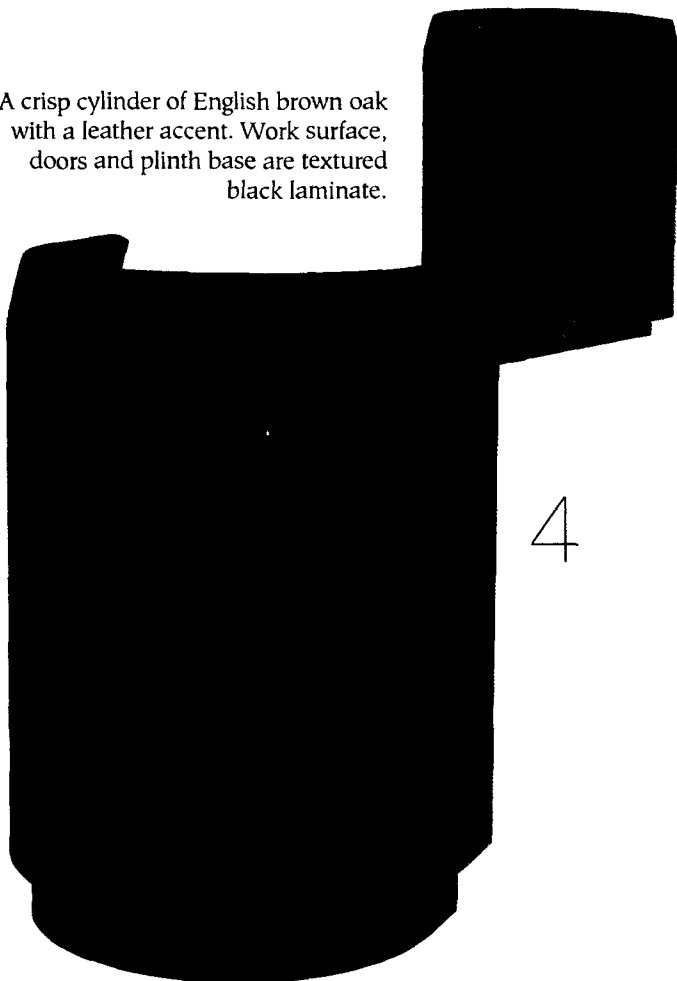

A contrast between teak veneer and
1¼" square Appalachian white oak.
The base plate is polished brass.

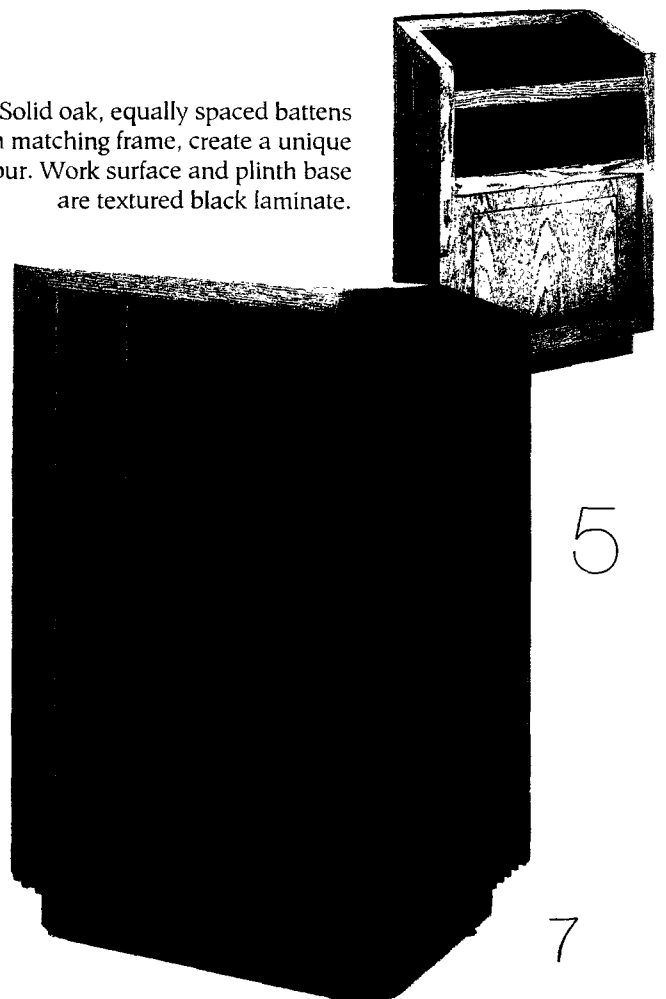

Exotic French walnut with a catalyzed
varnish finish. Plinth base is black chrome.

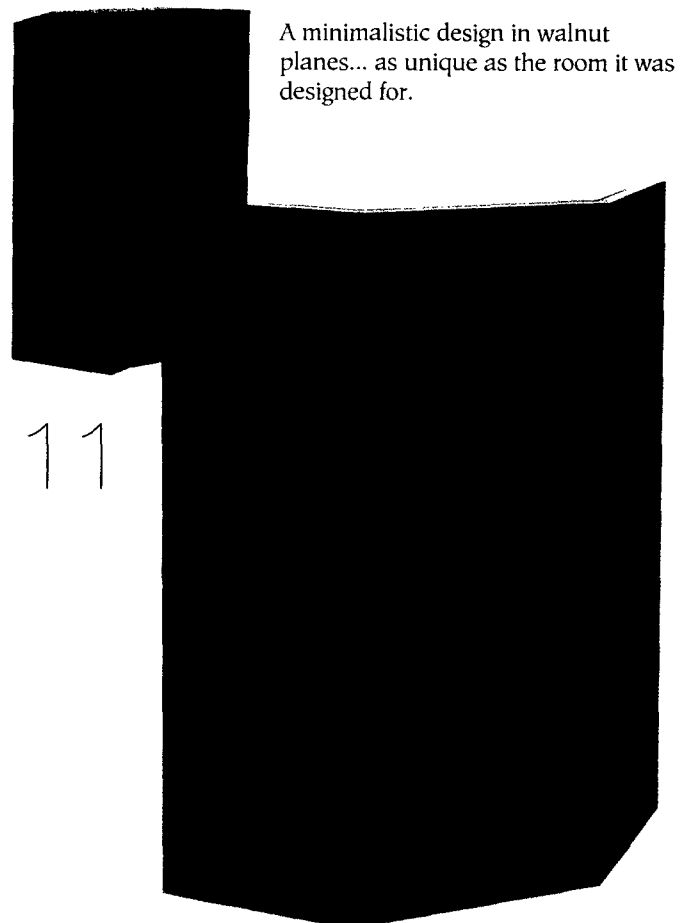

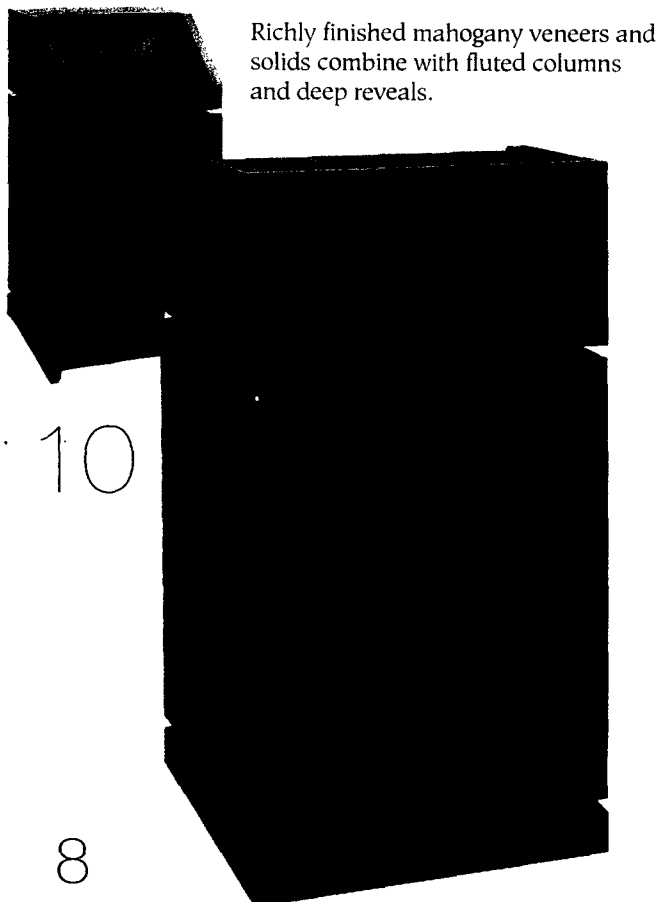

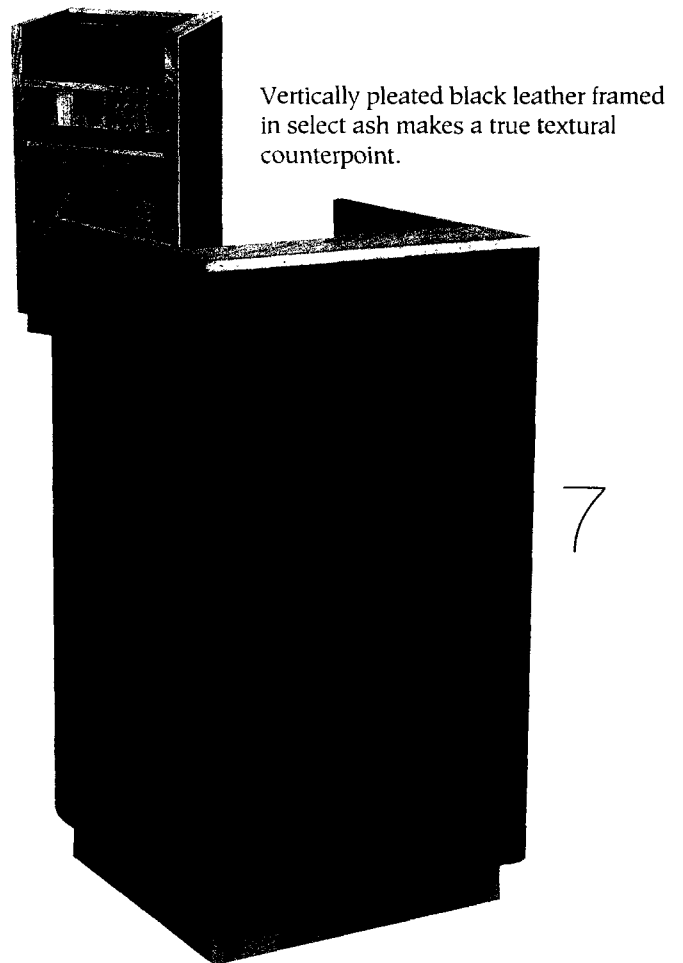

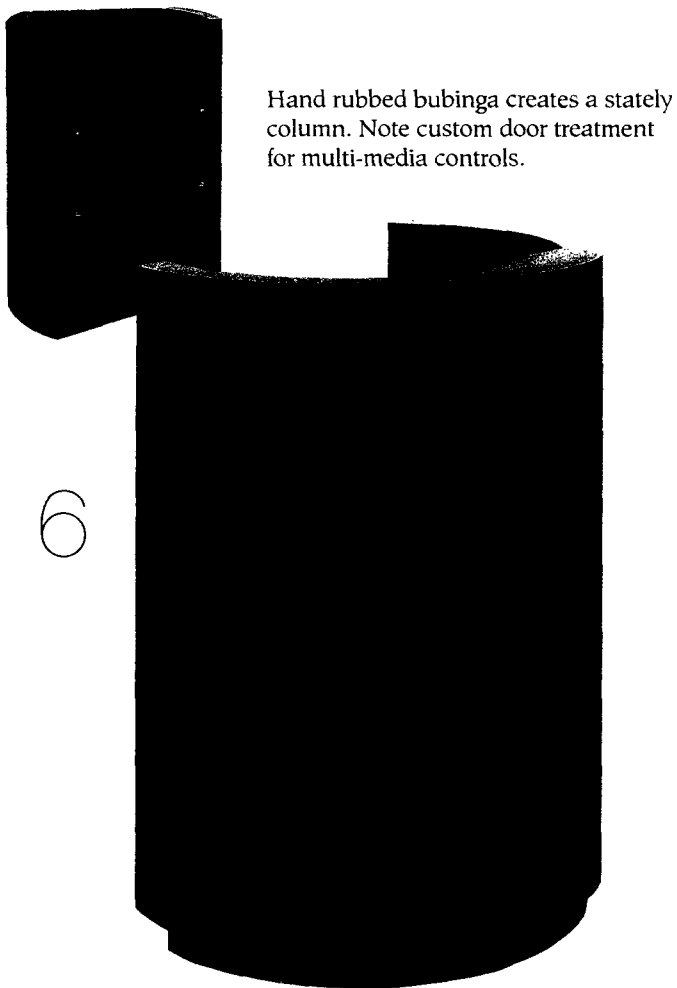

A crisp cylinder of English brown oak
with a leather accent. Work surface,
doors and plinth base are textured
black laminate.

Solid oak, equally spaced battens
with matching frame, create a unique
tambour. Work surface and plinth base
are textured black laminate.

A unique concept in cherry wood. Only the top (revealed) section raises and lowers.

8

Rich red oak tambour with deep reveals over a hardboard core. Plinth base and work surface are in textured black laminate.

9

Mahogany throughout with tight corner radius and heavy bull nose accents. Note brass foot rail.

12

Allowing for the pickup of a decor's secondary colors, here's a combination of rift oak, plastic laminate and stainless trim.

13

9

A blend of plain-sliced and quarter-sliced Honduras mahogany united by a solid 1/4" square brass inlay.

A truly exotic combination of sentamo and birds eye maple veneers. Features a one-piece work surface.

14

15

A raised multi-panel concept with graphic, deep reveals in Honduras mahogany veneers and solids.

Stand-up Desk*

For that person who likes to think on his feet! Mahogany veneers and solids embellished with molding and fluted corners. Polished brass foot rail.

16

*Ideal Maitre D's stand.

The Boardroom

Here's an example of VanSan's complete audio visual environment. Each piece designed and finished to compliment the overall objective. This suite of cabinets features the option of plain sliced cherry wood with classic relief molding. Our exclusive 5-step hand rubbed finish is standard.

VanSan

...about tables.

No matter what the size of your conference room here is a table, or we'll make it, to fit. The beauty of wood... from 48" round to 12 feet or larger racetrack or boat shapes with a wide selection of edge and base treatments to hold it all together. Choose standard or custom to match or compliment any design scheme.

Rectangle: RC-4896CH-7

(Shown in mahogany with chamfered edge and plain panel base)

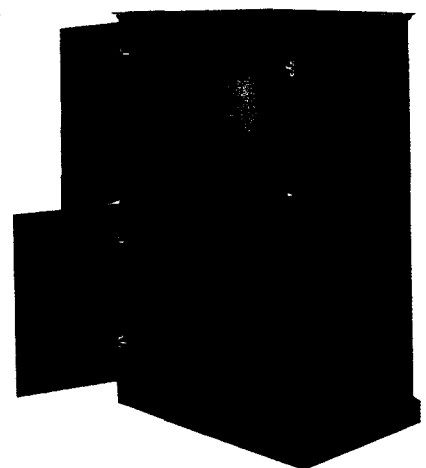

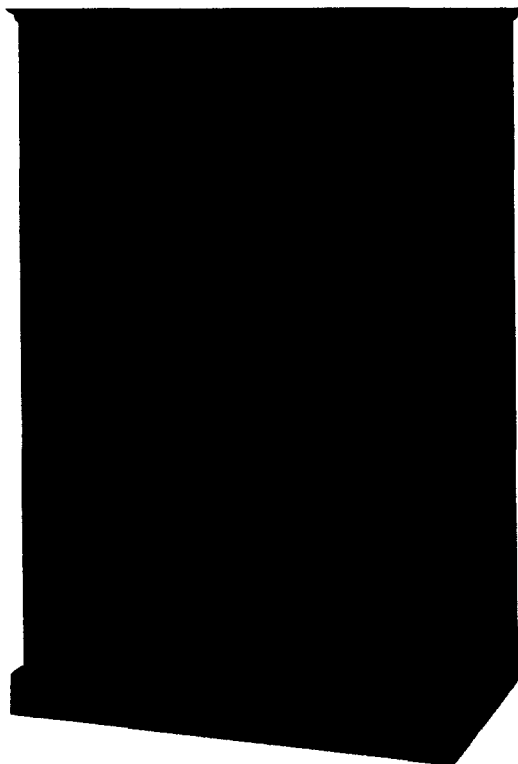

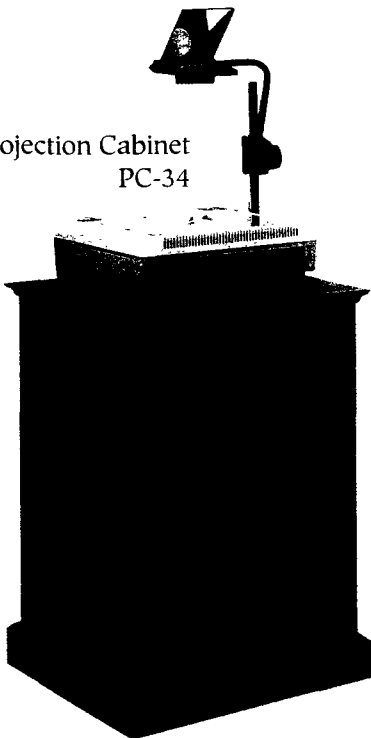

Rounded Rectangle
RR-4896BD-5

(Shown in dark oak with banded edge and rounded square base)

(Traditional edge detail - see table on cover)

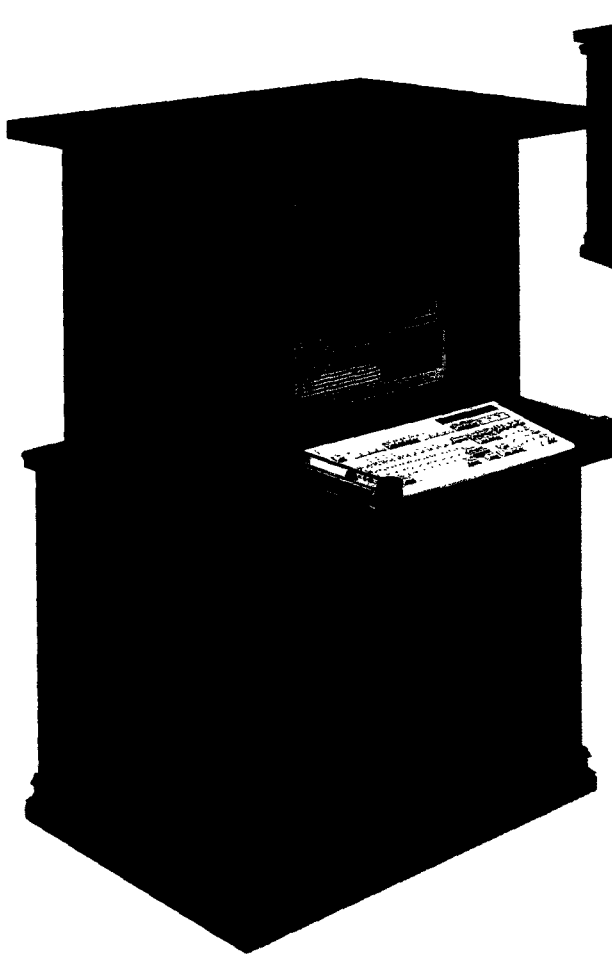

CABINETS

Projection Cabinet
PC-34

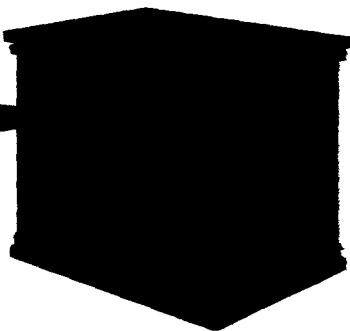

MC-39
Monitor Cabinet (Open & closed)

A five foot tall cabinet that can be custom designed for all your audio/visual needs.

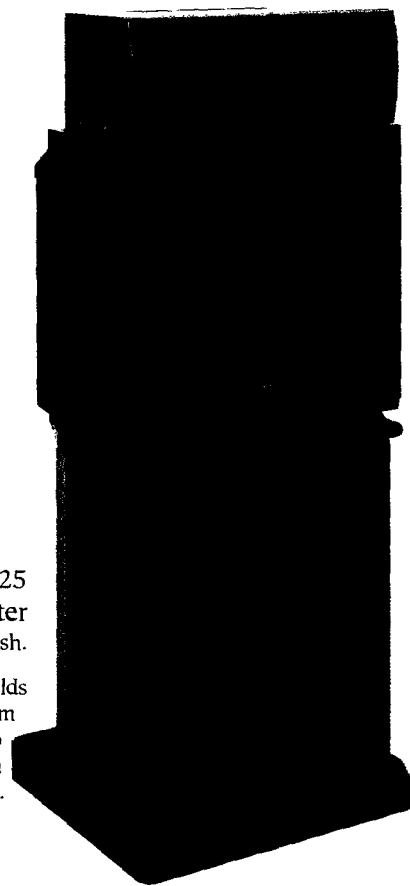

CRD-36L
Motorized Credenza (open & closed)
 Shown in optional dark oak finish.

Featuring VanSan's exclusive lift control... perfect for the executive office where too much hardware is just "too much". Use as a straight video and/or computer station.

MVC-25
Mobile Video Center
 Shown in dark grey metal finish.

A no-nonsense video "stack" that holds it all on easy slide 19" rack rails. From metal (shown here) to laminates, to the finest woods... any configuration or finish is available.

SPECIALIZED

Innovative & functional

Special function cabinetry for the executive suite has long been the hallmark at VanSan.

The cabinetry shown here is mostly the result of special client requests. The fine craftsmen at VanSan welcome the challenge. Your design or a "van" concept with our designers will assure the final credibility of your decor.

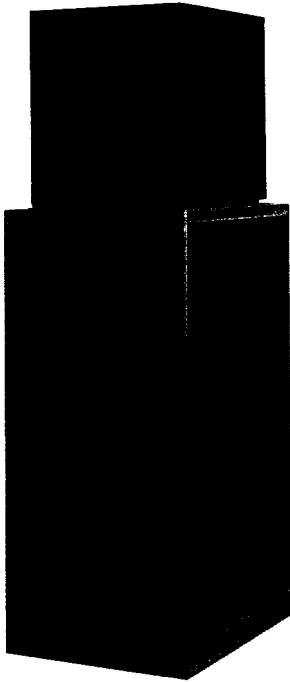

MPC-42
Mobile Presentation Console
 Shown in natural oak.

Makes the training room environment work. This cabinet lets you integrate an LCD panel, overhead projector and computer system for exciting presentations. Includes pull-out keyboard and slide out copy shelf. Can be customized for your particular equipment.

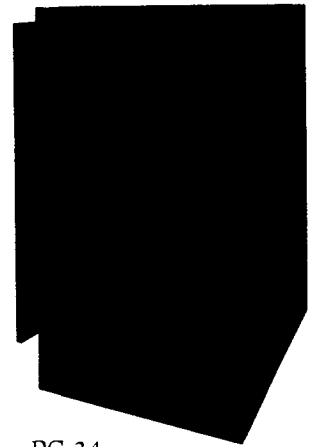

CABINETS

Projection Cabinets

Get rid of all those institutional looking roll-around carts! VanSan projection cabinets have the beauty of wood with the versatility (hidden casters) of carrying overhead projectors, video monitors, slide projectors, etc. Doors and multi-outlet strips are options. Numeral indicates height of unit, other sizes are available to customer specifications.

PC-42
Shown in natural oak.

PC-34
Shown in optional mahogany with optional door and traditional molding.

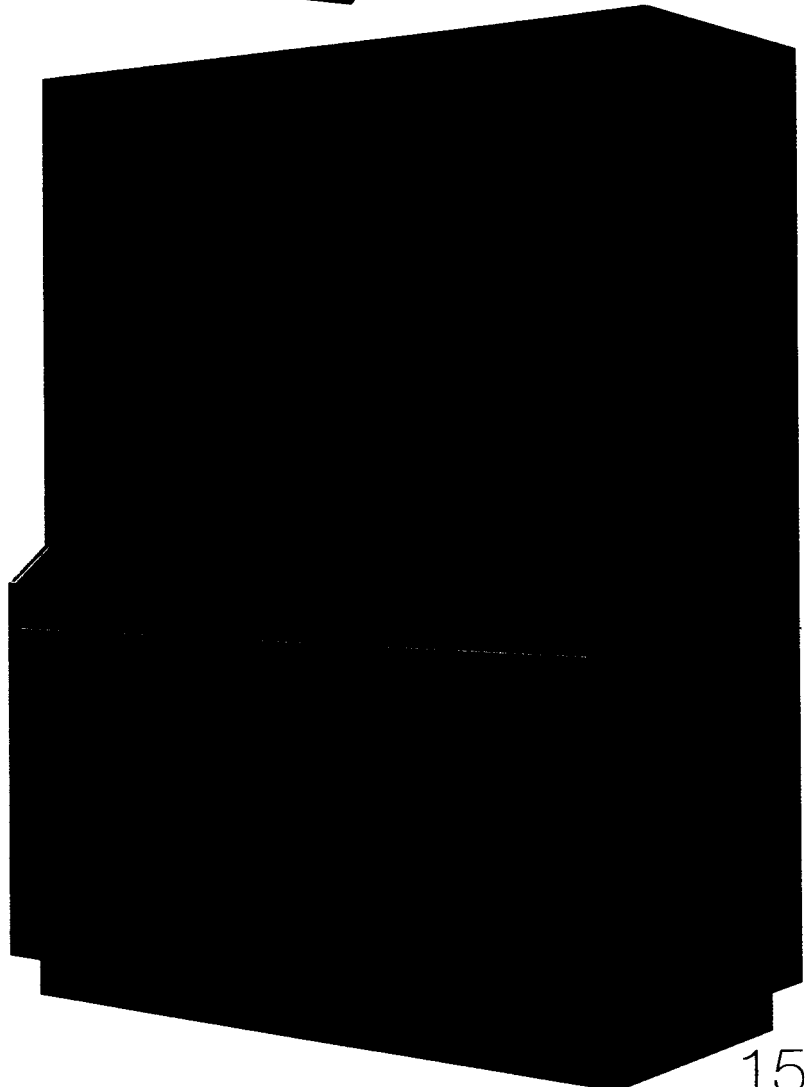

PC-30
Shown in optional medium oak with optional door.

PC-34
Shown in walnut with optional door and traditional molding.

Teleconferencing Cabinets

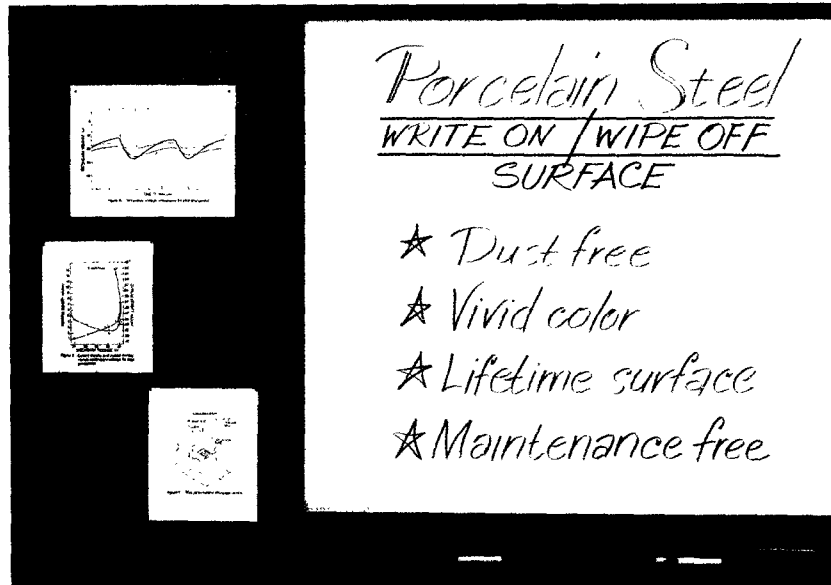

Inter-office communications with all the hardware under "cover". Most any configuration possible. Cameras can be hidden behind glass doors and the cabinet will hold all ancillary electronics. Each of these cabinets is unique to the equipment it will hold. Your equipment list with your design or ours will create the unit you want.

PRESENTATION

PB48-R: Shown in optional dark oak with radius edge and optional key/lock.

PB48-L: Shown in burgundy laminate with square edges, optional flip chart and hanger.

& TRAINING

Visual Communication

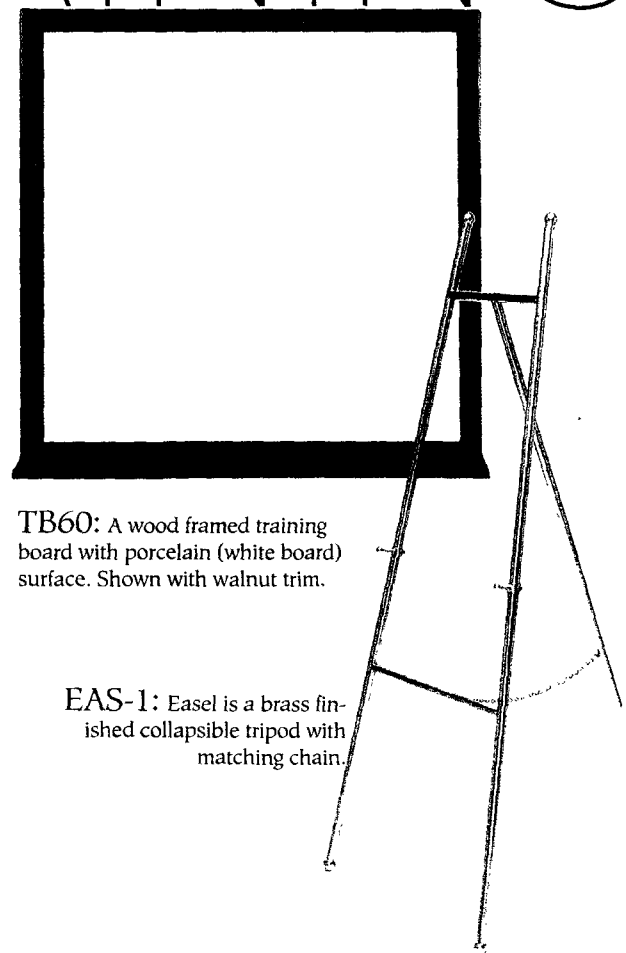

VanSan Presentation Boards are equally at home in the boardroom or training room. From 48" to 72" (closed dimension) in any wood laminate or edge treatment that will match or complement your decor.

Each board features a Write-On/Wipe-Off surface of glass like porcelain fused to a steel facing sheet and a deep sculptured wood marker tray. Side panels (inside doors) have a tacking panel covered in a close-weave fabric (quartz standard).

Options include: a variety of natural wood veneers, laminates and corner edge treatments or traditional molding, a concealed fine resolution projection screen, recessed illumination and a keyed door lock.

(Standard finishes: Natural oak, walnut or plastic laminates with square edge treatment).

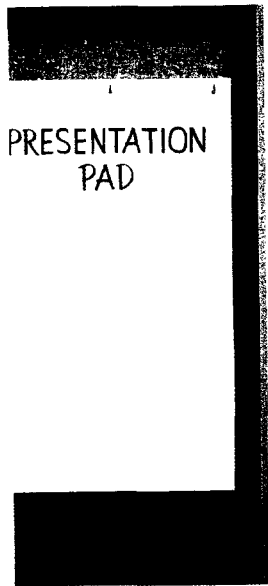

The Training room... from wall mounted white boards, a simple presentation easel, or a unified grouping of tables, the VanSan concept creates a crisp, clean learning atmosphere.

TB60: A wood framed training board with porcelain (white board) surface. Shown with walnut trim.

EAS-1: Easel is a brass finished collapsible tripod with matching chain.

BOARDS

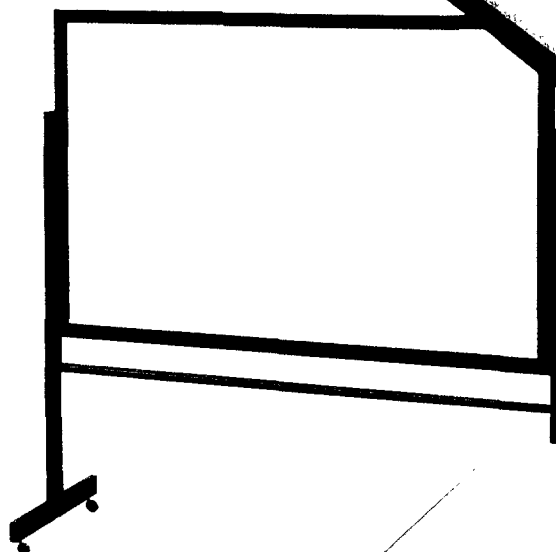

PRESENTATION
PAD

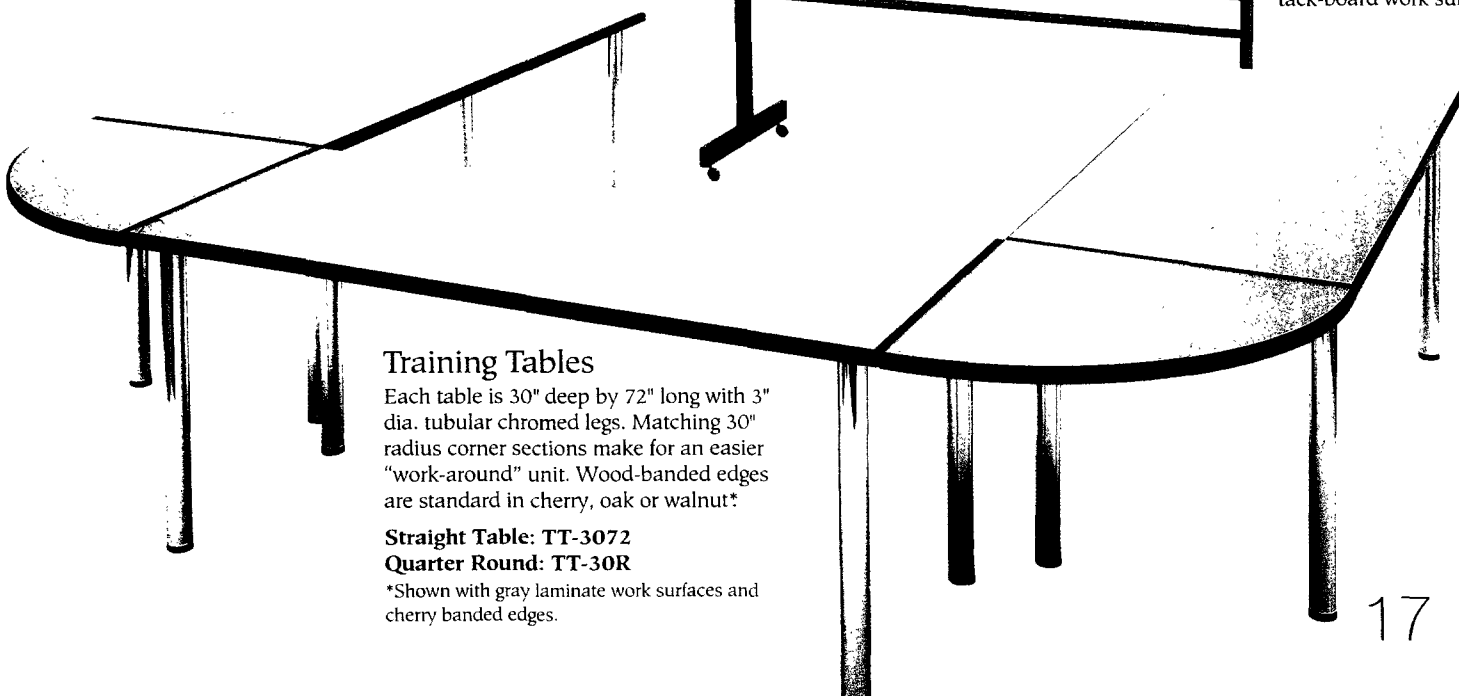

PB48-CPS
Shown in walnut with standard
quartz fabric and optional retractable projection screen.

ROOM AIDS

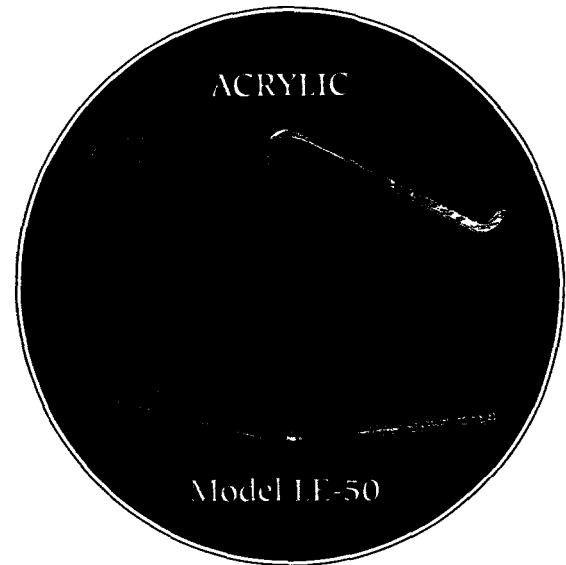

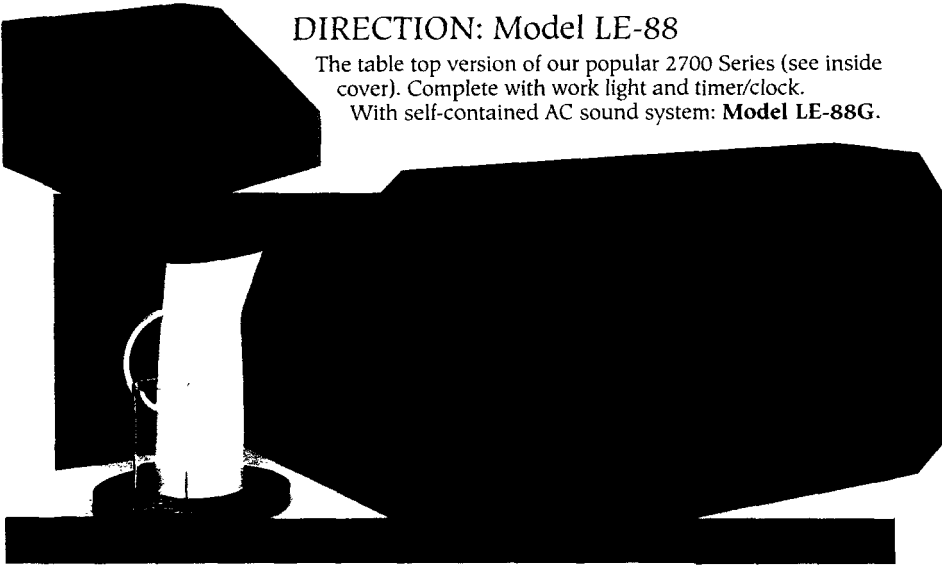

MTB72
Mobile Training
Board
Shown in cherry with
marker rack. Porcelain
face flips over for an all
tack-board work surface.

Training Tables
Each table is 30" deep by 72" long with 3"
dia. tubular chromed legs. Matching 30"
radius corner sections make for an easier
"work-around" unit. Wood-banded edges
are standard in cherry, oak or walnut*.
Straight Table: TT-3072
Quarter Round: TT-30R
*Shown with gray laminate work surfaces and
cherry banded edges.

COV-L	QUILTED PAD, for moving and storage of lectern
	PEDESTAL BASES
PS-69	For Models LE-33 and 44. Polished chrome**: 2 1/2" dia. column x 28"H and a base spread of 26". **Other metal finishes available on special order.
PS-89	For Models LE-22, 30, 40, 66, 77 and 88. Polished chrome**: 4" dia. column x 28"H and a base spread of 28".

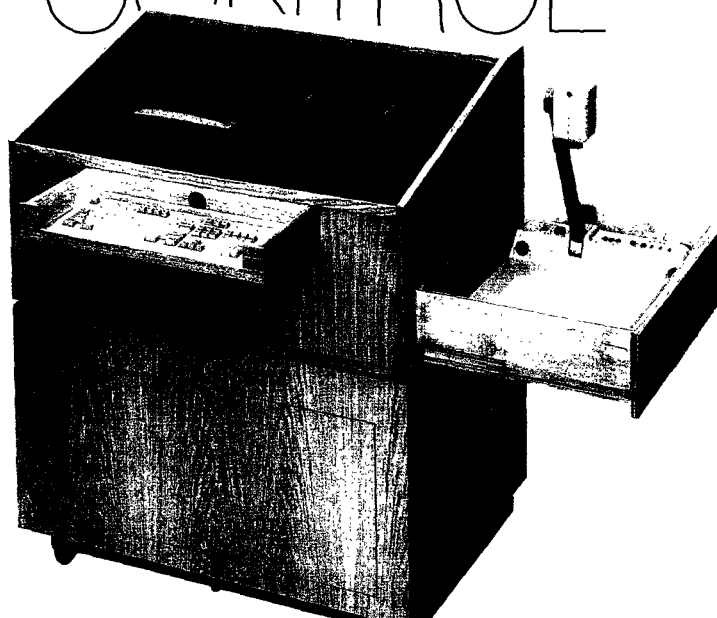

LOGO/GRAPHICS: A variety of techniques and materials can be used to personalize your lectern with company logo or graphic design. Laser cut in metal or matching/complimentary wood. Silk-screened in any number of colors. Sand blasted in wood. Engraved or cast in metal plate. Cost is determined by quantity, technique, material used and complexity of design.

MULTI-MEDIA CONTROL

...from your VanSan lectern

Here is just one example of a total media control station that is first, and foremost, a true lectern. Cutouts in the work surface and structural bracing allow for CPU/video monitor and controls. Custom drawers have been fitted for keyboard and projection equipment while additional equipment is "handy" behind cabinet enclosures.

This type of modification can be made to any VanSan lectern or conference room cabinetry. You think of it... we'll make it happen.

VanSan structural integrity [says it all]

ARCHITECTURAL SPECIFICATIONS

All veneers are book-matched from sequence numbered stock with exposed edges banded under pressure. Mitered or tongue and groove joinery is pressure-clamped and glued. All mounting cleats are screwed in place. Bases are joined with spline or miter corners, glued and hand clamped. All finishes are VanSan's exclusive five-coat process, hand sanded and hand rubbed.

Special notes:

Standard lecterns: Series 100 & 200

Table top lectern: Model LE-22

These lecterns feature a walnut or oak wood-grain finish (or other specified material), bonded to first quality fiber board with all exposed edges banded under pressure. Mitered or tongue and groove joinery is pressure clamped and glued and all mounting cleats are screwed in place.

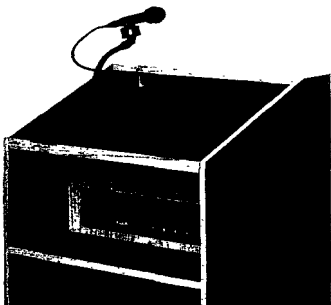

The Series 200 and LE-22 are specifically carpet covered. Carpet is Vee-Lok® (Oxford style) from General Felt Industries (GFI®), see inset on page 3. Lectern bases are joined with mitered corners, glued and hand clamped.

EQUIPMENT OPTIONS

Self-contained AC Sound System

The VanSan Sound System consists of the following: 75-watt MOSFET amplifier; one tri-radiant speaker system; one dynamic, unidirectional microphone; one built-in AC power cord. The control panel includes ON/OFF Indicator LED; two microphone volume controls; line

volume control; bass/treble control; XLR Connector for a second microphone; two line input jacks for audio source and one output jack for satellite speaker. Specify sound system by adding the letter "G" to the model number (i.e. LE-88G).

Exclusive "Lectrajust" Height Control

The VanSan "Lectrajust" height control allows lectern to be raised or lowered to any point between 46½" high to 54½" high (8 inches) at the rate of 1" per second. Motor and lift assembly are noise-isolated for smooth, silent operation. A rocker switch controls the motor and features a built-in protection against over-run. The motor is enclosed in a locked panel and has a detachable, 3-wire grounded plug and Hubbell socket. Select "Lectrajust" by adding the letter "L" to model number (i.e. 1700L-32).

Note: VanSan standard finishes are natural oak and walnut. All other woods are optional. Call for quotation.

A WORD ON WOOD.

Shown above is a (small) sampling of the 35 varieties of wood veneer that we have used for VanSan lectern finishes. Since wood is a natural product, it is to be expected that no matter how characteristic a wood is, there will be slight variations in color value and grain pattern from piece to piece. Also, translating a piece of wood from the actual object, to color photograph and then to the printed page creates still further variations. We cannot guarantee a perfect match from printed image to finished product... we can guarantee you the finest quality of wood, prepared and finished by VanSan's dedicated craftsmen.
