SWANKE HAYDEN CONNELL ARCHITECTS

Memorandum

TO: Glenn Pymonto
DCAS/DRES

FROM: Juan M. Mejia

SUBJECT: Mayor's Office of Emergency Management
7 World Trade Center
SHCA Project No. 5576A
"OEM revisions request"

DATE: March 4, 1999

Attached please find fuel oil piping route submitted to the P.A. for their review, and a new proposed routing As per walk thru with Ambassador Construction and Walter Weems III of Silversteins Properties Inc. on February 26, 1999.

- 1- The proposed routing submitted to the P.A. will be approved if we comply with the port's requirement of encasing the pipe in concrete for the full length of the run, which would be an expensive task. (this has not been done as of today)
- 2- The new proposed routing has not been fully investigated by the contractor and at this time we do not know if there could be any hidden conditions above the ceilings to prevent this to be a workable solution.
