Re: Air Sampling for Silica
DeSoto / PS 130 M
ATC Project No. 15-19125-0345

Dear Mr. Orlan:

ATC Associates Inc. (ATC) is pleased to provide this report of the results of air monitoring for silica-containing dust conducted on August 26, 2002, at the referenced school. The New York City Department of Education (DOE) requested this monitoring prior to the resumption of classes to verify that acceptable indoor air quality is being maintained.

Scope of Work

ATC collected a total of three (3) samples (and one blank) for respirable dust using pre-weighed 37mm PVC filters connected to size-selective cyclones to remove the larger (non-respirable) particles prior to deposition on the filters. All of the samples were collected indoors. The samples were sent to PSC Analytical Services, Inc., an American Industrial Hygiene Association accredited laboratory in Reading, PA. Analysis for silica was performed by x-ray diffraction according to OSHA Method 142. A copy of the analytical report is attached.

Mr. Wagdi Abdelshahid, and Mr. Tenzin Namgyal, Industrial Hygienists of ATC's New York City office, collected the samples consistent with generally accepted industrial hygiene practices. As with all such sampling, there were inherent limitations created by constraints of time, operational and work practice variability, variations in air contaminant concentrations and sampling and analytical accuracy. The results of the sampling represent conditions found on the dates the samples were collected.

Results

Samples were obtained in the following locations: 1st floor Main Lobby, 4th floor hallway by Stair C, and 5th floor hallway by Stair B.
The results of all of the samples were below the detection limit for silica (<5 micrograms per sample).

CONFIDENTIAL,

SUBJECT TO PROTECTIVE ORDER NO. 2, SEPT. 2008

It is our pleasure to provide these indoor air consultative services to the New York City Department of Education. If you have any questions about this report, please call (212) 353-8280, extension 298.

Sincerely,
ATC Associates, Inc.

Wagdi Abdelshahid
Industrial Hygienist
Industrial Hygiene Division
