Asbestos Inspection Report

Premise No. 130 Liberty Street					Inspection Date: 03/12/09	
Floor Various	Zip 10006	Borough 1	Block 54	Lot 1	Squad # 1	Badge # A062

Inspector M.Gagnidze	Building Type F	Basis of Inspection TRU2068MN08	Photos Taken yes
Contractor's Name LVI Environmental		Sample Number ----------	
Address City		Sample Number ----------	
State Zip Phone		Sample Number ----------	
Laboratory Name TRC Environmental Corp		Owner's Name The Lower Manhattan Development Corp.	
Address City 1340 Broadway New York		Address City One Liberty Plaza New York	
State Zip Phone NY 10018		State Zip Phone NY 10006 (212) 962-2300	
Contact Person Arnel Javal, Sr. Proj. Mgr/TRC Environmental		Time of Inspection from: 6:20 pm to 7:15 pm	

I arrived at the premise at 6:20 pm. LVI schedule informed that activities include: clear floor, cut ducts, demo walls, ceilings on 1st floor.

I proceeded to the decon, signed the log book, don the appropriate level of personal protective equipment to enter the regulated area on 1st floor. Three workers were present for the decon maintenance, cleaning the shower chambers and organizing the clean room. Manometer reading of the negative air pressure was -0.045.

1st Floor – 58 workers were present inside the work area. Workers were clearing the shafts from debris, spraying with amended water, placing debris into the boxes.

Two workers on mezzanine inside the engine room were cutting and removing conduit.

At the east side hallway workers in two scissor lifts were breaking down the hard drop ceiling, using hammer and electrical power tool, attached to the HEPA vacuum. Four workers harnessed in two scissor lifts were breaking plaster ceiling into the pieces on the west side hallway, bringing down pieces from ceiling to the floor; one worker was spraying the area with amended water.

Other workers were: cutting metal into small pieces at the various locations, placing into the boxes and spraying with amended water; preparing boxes, wrapping beams with poly, loading out sealed and sprayed boxes through the north side waste decon. A large amount of debris and poly wrapped beams still exists on the floor.

I observed one light bulb without protection on it. Foreman was advised, and he contacted electricians to inform them that light bulb needed to be covered with cage.

56 Gaylord boxes were on the floor ready to be taken out. 35 micro trap machines were powered on and 5 on stand by. Inspection was done on micro trap tents.

After following the decontamination procedure I signed the log book and left the decon.

Inspection was done on ATC trailer.
