**RE: World Trade Center Dewatering
Contract No. 20020004649
MTA Job 01-4906
Water Analyses**

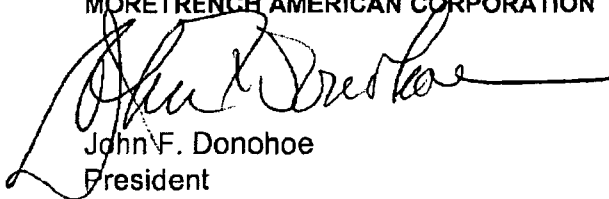

Dear Brian:

Attached find results of the analysis of the water samples taken from the WTC site on May 22, 2002. MTBE level for the sump discharge (B-6 30 hp sump pump) was 49 ppb and for the dewatering wells (Main Discharge) was 2.1 ppb.

Chlorodifluoromethane was 74 ppb in the sump discharge and 12 ppb in the dewatering well discharge.

We are also forwarding a copy of the tables which track MTBE and Chlorodifluoromethane concentrations for all of the water sample testing which has been performed on the site.

Very truly yours,
MORETRENCH AMERICAN CORPORATION

John F. Donohoe
President
