Dear Brian:

Attached find results of the analysis of the water samples taken from the WTC site on June 24, 2002. MTBE level for the Greenwich Street well was 0.3.

Chlorodifluoromethane was 1.0 ppb.

We are also forwarding a copy of the tables which track MTBE and Chlorodifluoromethane concentrations for all of the water sample testing which has been performed on the site.

Asbestos results for Greenwich Street are also included. Dioxin results will be forwarded upon Moretrench's receipt of same.

Very truly yours,
MORETRENCH AMERICAN CORPORATION

John F. Donohoe
President
