MEMORANDUM

From: Robert C. Adams, CIH, CSP RCA/COR
Director EHSS

To: Michael Burton
Executive Deputy Commissioner

RE: Stuyvesant High School Air Sampling Results

Two ambient air samples for asbestos were collected between the hours of **12 AM and 8 AM on 10/13/01** outside Stuyvesant High School. The samples were analyzed using transmission electron microscopy (TEM), which provides results that are specific for the presence of asbestos fibers. Using this method, the EPA guideline for acceptable concentrations is **70 structures per square millimeter (s/mm^2)**. The results obtained for this round of sampling were as follows:

LOCATION	Airborne Concentration (s/mm^2)
Pier 25/ Outside north exit of school	ND <16.67
Pier 25/Northwest of Stuyvesant High School	ND <16.67

ND = not detected

The laboratory chain of custody sheet(s) are attached.

Please contact Robert Adams if there are any questions.
