ENTRY STATUS DATES		OBSERVATIONS AND COMMENTS
Open	Closed	
0700	0730	Site walk no issues.
0800	0830	Corrected crane operator and iron workers about hard hats.
0900	0915	Site walk. Provided personnel with safety glasses.
1000	1030	Melofchik assisted EPA with air sampling of the big pile. Spencer from OSHA and Tony Adams from Bechtel pointed out that Articulated Rubber tired loader at Customs Building (possibly borrowed from Bovis) has a broken horn – McKeever gave the operator an air horn until loader is fixed. ~~Steve Nakasaki of Bechtel pointed out that waste oil should be handled better~~
1030	1100	Steve Nakasaki of Bechtel pointed out that waste oil should be handled better throughout the site in either 55 gallon drums or overpacks, especially in the area of the center road. We set up an area labeled used oil and placed (2) 55 gallon drums and a funnel in that area. Began to inform foremen about putting oil in proper area.
1100	1200	Site Walk. Corrected people on hard hats and safety glasses. Many people from other sectors coming into AMEC sector to watch the unvailing of the memorial.
1200	1230	Site Walk. Corrected people on hard hats and safety glasses.
1300	1400	Unveiling of the memorial at ground zero.
1430	1445	Site Walk to Pier 6. Chris Devlin inquired about additional dust suppression and additional safety vests.
1500	1515	Site walk. No issues identified, shifts beginning to change. OSHA air monitoring pumps damaged in basket.
1530	1545	Spoke with Tony Adams about iron worker riding in bucket of frontend loader. Spoke to his foreman and it has been straightened out.
1600	1645	Bectel and OSHA had issue regarding securing basket over ball.
