Job Number 201113793  
P.O. # Turner Construction  
Turner Construction; 30 W. Broadway, (Fiterman Hall), NY

Dear Fred Milteer:

Enclosed are the results of Asbestos Analysis - Bulk Qualitative Protocol of the following Total Safety Consulting, LLC samples, received at SCILAB on Friday, November 30, 2001, for a 24 hour turnaround:

Blank, 13C, 9C, 4C, 1C

The 5 samples, placed in zip lock bag, were shipped to SciLab via Federal Express. Total Safety Consulting, LLC requested Bulk-Qualitative analysis of these samples.

The samples were prepared and analyzed by using a Standard Operating Procedure developed by Scientific Laboratories, Inc.. After preparation, using non-quantitative matrix reduction if necessary, the presence or absence of asbestos is determined by PLM and/or TEM as indicated on the attached summary table. Quantification after the fact is not possible without a new preparation. This report relates ONLY to the analysis expressed as "asbestos present" or "no asbestos visible". This report must not be used to claim product endorsement or approval by SciLab, NVLAP, ELAP or any other associated SciLab certifying agency. The National Institute of Standards and Technology Accreditation requirements, mandates that this report must not be reproduced, except in full, and with the approval of the laboratory.

SciLab appreciates this opportunity to serve your organization. Please contact us for any further assistance or with any questions.

Sincerely,

Paul Mucha  
Laboratory Director
