U.S. Environmental Protection Agency releases results of Environmental Monitoring Near World Trade Center Disaster Site

The EPA, in cooperation with DOH and other governmental agencies, continues to collect environmental sampling data in and around the site of the WTC disaster. Daily reports are now available at www.epa.gov. The EPA website contains results of EPA sampling for air, water, and dust; an interactive map showing the locations of EPA air monitoring stations in lower Manhattan; and descriptions of ongoing EPA activities in support of NYC's disaster response.
