EPA Monitoring Site: Stuyvesant High

Asbestos Air Monitoring Data

This table shows how much asbestos EPA measured in the air at this site, on the dates and times shown. Daily summaries of this data and how it compares to the level of concern for public health are provided on the [EPA home page](#).

EPA can measure asbestos in several ways. For these data tables, EPA is providing measurements in terms of the number of asbestos structures found per square millimeter within our air monitors (structures can include single, overlapping, and bundles of asbestos fibers). The level of concern for asbestos is based on continuous exposure to more than 70 structures per square millimeter for an extended period. **Because cleanup efforts will reduce asbestos levels dramatically over the next several weeks, EPA does not expect people exposed to this amount of asbestos to have increased risks of health problems.**

Date	Time	Measurement* (structures/square millimeter)
10/06/2001	12 am to 9 am	Not Detected
10/05/2001	12 am to 12 am	16
10/05/2001	12 pm to 12 am	Not Detected
10/04/2001	12 pm to 12 am	Not Detected
10/03/2001	12 pm to 12 am	Not Detected
10/03/2001	12 am to 12 pm	Not Detected
10/02/2001	12:01 am to 12 pm	Not Detected
10/02/2001	12 pm to 12 am	14.8†
10/01/2001	12 pm to 12 am (10/02)	Not Detected
09/30/2001	12 am to 12 pm	Not Detected
09/29/2001	12 am to 12 pm	Not Detected
09/29/2001	12 pm to 12 am (09/30)	Not Detected
09/28/2001	12 am to 12 pm	Not Detected
09/28/2001	12 pm to 12 am (09/29)	Not Detected

Description of the Benchmarks, Standards, and Guidelines used to Evaluate Environmental Conditions.

*The information contained in this database should be considered provisional and may be subject to adjustment upon final analysis.

† These reported results can be considered higher than actual results since conservative volume adjustments were used.

DUP - indicates that more than one sample was taken at a particular time; all values are reported.

There may be gaps in daily readings because of relocated construction equipment and variations in sampling locations.

For more information about asbestos exposure and human health, see the [Asbestos Fact Sheet](#).
