RE: Notification of Exposure Monitoring and Bulk Sample Results

Ray,

Attached are the air sample results from exposure monitoring for airborne asbestos fibers at WTC#6, level B. Results of both of area samples and personal samples are included. Air sample results indicated exposures to asbestos were below limit of detection. You will need to inform employees of the results of exposure monitoring.

Also included is the results of bulk sample analysis from pipe insulation off conduit path ST WTC #6, B6.

Respectfully,
