Direct Microscopic Examination Report

June 22, 2002

Mr. Fred Burkhardt
ATC New York
104 E. 25th St., 10th Floor
New York, NY 10010
Bovis / DDC

Date Sampled: June 12, 2002
Date Received: June 14, 2002
Date Analyzed: June 14, 2002
Hygeia Reference No.: 00015 02 0007
Samples Analyzed: 8

Client Sample ID / Hygeia Sample ID	Sample Location	Sample Description	Mold Growth**	Overall Impression / Comments*
S 1 766877	N. End Area	Swab	heavy *Penicillium/Aspergillus* heavy *Stachybotrys chartarum*	mold growth
S 2 766878	S. End Two Col. From Pit	Swab	heavy *Penicillium/Aspergillus* very light *Chaetomium*	mold growth
S 3 766879	Pit Area	Swab	heavy *Penicillium/Aspergillus*	mold growth
S 4 766880	Outside Safeway Decon	Swab	very light *Penicillium/Aspergillus*	minimal mold growth
BL 1 766881	N. End Area	Bulk	NONE	normal trapping
BL 2 766882	S. End two Col. From Pit	Bulk	light *Penicillium/Aspergillus*	mold growth
BL 3 766883	Pit Area	Bulk	light *Penicillium/Aspergillus*	mold growth
BL 4 766884	Outside Safeway Decon.	Bulk	NONE	normal trapping

*"Normal trapping" reflects an accumulation of spores as normal fallout form air that collect on surfaces. Occasionally, spore types may accumulate in numbers higher than expected for normal trapping. Such cases may be denoted as "minimal mold growth" or "growth nearby" to reflect this.

**Mold levels are indicated as very light, light, moderate, heavy or very heavy. This is an estimate of density and / or spread.
