Date Analyzed: 10/2/01

*NAD/NSD = no asbestos detected; NA = not analyzed; NA/PS = not analyzed / positive stop. PLM Bulk Asbestos Analysis by EPA 600/4-82-030 per 40 CFR 763 (NYLAP Lab #200546-0) and ELAP PLM Analysis Protocol 19E.1 for New York samples (NYSDOH ELAP Lab # 11480); ELAP TEM Analysis Protocol 19E.4 for negative NY NOB samples. Note: PLM is not consistently reliable in detecting asbestos in floor coverings and similar non-friable organically bound materials. TEM is currently the only method that can be used to determine if this material can be considered or treated as non-asbestos-containing in New York State (also see EPA Advisory for floor tile, FR 59, 145, 13970, 8/1/94). National Institute of Standards and Technology Accreditation requirements mandate that this report must not be reproduced except in full without the approval of the laboratory. This PLM report relates ONLY to the items tested. ARIAN 102843; VT Cert# AL016065 NVA=No Visible Asbestos
