**Re: Wipe Samples for Polychlorinated Biphenyls
P. S. 234M
ATC Project No. 15-19125-0279**

Dear Mr. Orlan:

ATC Associates Inc. (ATC) is pleased to provide this report of the results of the wipe samples for polychlorinated biphenyls (PCBs) collected on April 9, 2002, at the referenced location. The New York City Board of Education (BOE) requested these samples to evaluate possible contamination in the school building according to a recommendation from Environ Corp., consultant to the parents association.

Scope of Work

The samples were collected using sterile gauze pads and hexane as a solvent. The solvent was provided and samples were analyzed by PSC Analytical Services, Inc. (PSC), an American Industrial Hygiene Association-accredited laboratory in Reading, PA. The PCB analysis was performed using EPA Method 8082B.

Tenzin Namgyal, Industrial Hygienist of ATC's New York City office, collected the samples consistent with generally accepted industrial hygiene practices. There were inherent limitations created by constraints of time, operational and work practice variability, variations in contaminant concentrations, and sampling and analytical accuracy. The results of the sampling represent conditions found on the date the samples were collected.

Results

ATC submitted two (2) wipe samples for PCBs to PSC for analysis. A copy of the analytical laboratory report is provided in the Attachment.

Mr. Bernard P. Orlan
Wipe Samples for PCBs

ATC Project No. 15-19125-0279

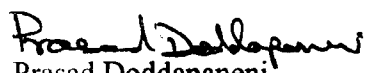

The two floor areas sampled were collected from 1st Floor hallway – East and 1st Floor hallway – West. The surface area for each sample was 100 square centimeters (100cm²).

Each sample was analyzed for seven (7) PCB compounds (Attachment). The PCB results of both samples were *below the reporting limits* (2.0 micrograms/sample) for the analyses.

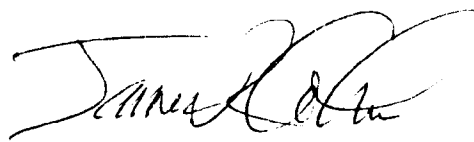

Currently, the Environmental Protection Agency spill clean-up standard for PCBs on non-porous surfaces is 10 micrograms per 100 square centimeters or less (<10ug/100cm²) as stated in 40 CFR 761.

It is our pleasure to provide these indoor environmental services to the New York City Board of Education. If you have any questions about this report, please call (212) 353-8280, extension 212 or 290.

Sincerely,
ATC ASSOCIATES INC.
