RE: **World Trade Center Dewatering**
Contract No. 20020004649
MTA Job 01-4906
Water Analyses

Dear Brian:

Attached find a summary of the analytical results of the water samples taken from the WTC site on January 9, 2002. The results are partial in that not all of the tests have been completed, however, MTBE for the dewatering discharge and the sump discharge are 19 and 94 ppb (ug/l), respectively. Please note that the "NY TAGM clean up objective" on the analysis form is for soil and not for groundwater.

Very truly yours,
MORETRENCH AMERICAN CORPORATION

John F. Donohoe
President

cc: Billy Klingler, MTA
