SUBJECT: RE: Summary of Lead Wipe Sample Results - Downtown Schools

Thanks Mark

>>> "Mark Terjesen" <terjesen15@atc-enviro.com> 03/26/02 05:37PM >>>
Attached is the summary of lead wipe sample analysis results for
downtown
schools as well as a location breakdown for each as requested.
Please note
that these documents include updated results for wipe samples
collected
this past week and should replace the original documents we sent
previously.
Should you have any questions or require additional information
please do
not hesitate to contact me.

Yes. We'll breakdown information as requested and email it to you by
the end
of the day (Monday)or early tommorrow. Please let me know if you need
any
additional information regarding these samples.

Thanks again Mark for providing me with this information, it was helpful. I need a further breakdown of the data. I need to know, How many windowsill samples were taken and how many elevations there were; How many floor samples were taken and the number of elevations; Of the floor samples how many were collected from hallways/lobbies, entry points into the school, and classrooms, and the number of elevations for each.

Is this something you can provide me with?

>>> "Mark Terjesen" <terjesen15@atc-enviro.com> 03/15/02 05:40PM >>>
Attached are individual summaries for Lead Wipe samples taken at each of the six (6) downtown schools as requested. Results have been compared to HUD clearance criteria following lead abatement work (i.e. 40 ug/sq. ft. - Floor; 250 ug/sq. ft. - window sills and 800 ug/sq. ft. - window wells).
Feel free to call me should you have any questions or require additional information.
