Re: Limited settled dust bulk sampling for fiberglass at P.S. 001M
8 Henry Street
New York, New York 10038

Dear Mr. Orlan:

At your request, ATC Associates, Inc. representative Mr. Herant Antonyant visited P.S. 001M located at 8 Henry Street, New York, NY 10038 on August 24, 2002. The purpose of the site visit was to perform a settled dust bulk sampling to be analyzed for fiberglass fiber content on areas indicated to ATC by the New York City Board of Education (NYC-BOE). These areas are the following:

- 1st Floor Lobby
- Cafeteria
- 1st Floor, 2nd Floor, 3rd Floor, 4th Floor, 5th Floor Hallway
- 1st Floor Playarea
- 2nd Floor Auditorium
- Room 213, 402

The purpose of the dust bulk sampling is to determine if settled dust in the school contains fiberglass fibers.

As per your request, a total of eleven (11) settled dust bulk samples were collected from the aforementioned areas and were analyzed utilizing Polarized Light Microscopy (PLM).

Analytical results indicated that none of the eleven (11) collected settled dust bulk samples contain fiberglass fibers.

The settled dust bulk sampling performed was limited to testing for fiberglass in locations indicated by the NYC-BOE.

NYC 9/11 Public Portal Document

Attached please find the following:

- Settled dust bulk sample chain of custody form and laboratory results
- Laboratory and personnel certificates

If you have any questions or require additional information regarding this limited settled dust bulk sampling, please do not hesitate to contact me at (212) 353-8280 extension #211.

Sincerely,
ATC Associates, Inc.
